

Sathyanarayana AN

Senior Mobile Application Developer

👤 Profile

Hi, I am a programmer, specializing in the mobile app development arena.

For the last 6 years, I have been developing mobile application using React Native & Flutter framework.

I'm currently employed as Senior Mobile Application developer at Unicity Health Private Limited. I'm hands on in all stages of the developing & programming cycle, from planning and design to testing and deployment.

Something that I love about programming is the opportunity to work with people from a wide range of disciplines. The software development life-cycle involves working with so many different people and departments and, as a people person and someone who loves to build new relationships, it's great to be able to come together with other professionals who are striving towards the same goal.
